Subject: Application for the O2Geeks Paid Internship Program — Summer 2026

Dear Hiring Team,

I am a third-year BS Artificial Intelligence student at COMSATS University, Islamabad, with a CGPA of 3.45. I would like to apply for a position in O2Geeks' Summer 2026 Paid Internship Program. Having already interned at O2Geeks in Summer 2025, I know your work culture and technical standards well, and I am eager to contribute again.

During my previous internship, I built backend APIs for user login, real-time chat, notifications, and admin features using FastAPI and PostgreSQL. I also connected AI services — such as a recommendation engine and a price suggestion model — into live production systems, and managed deployment using Docker and Railway. This gave me practical experience across the full development cycle, from writing clean code to shipping a working product.

Beyond my internship, I have built projects including an AI Recruitment System, a university marketplace API, and a bank churn prediction model using neural networks (83% accuracy). My core skills include Python, FastAPI, PostgreSQL, TensorFlow, PyTorch, Docker, and NLP. I also hold certifications in Data Science, Azure Machine Learning, and Prompt Engineering. As a member of the Hexagon AI/ML Society at COMSATS, I have helped run workshops and guided fellow students — which has strengthened my teamwork and communication skills.

I am ready to take on any role that matches my skills and helps me grow further. I would welcome the chance to discuss how I can contribute to your team this summer. Thank you for your time and consideration.

Sincerely,

Mian Ameer Muhammad
